A&A-01.1	[Yes]
A&A-01.2	[Yes]
A&A-02.1	[Yes]
A&A-03.1	[Yes]
A&A-04.1	[Yes]

Cloudflare's Governance, Risk and Compliance team works with other internal team (legal, privacy, engineering, etc) to identify regulatory, legislative, and contractual requirements.

A&A-05.1	[Yes]
A&A-06.1	[Yes]

A&A-06.2 [Yes]

AIS-01.1 [Yes]

Cloudflare's information security policies are aligned with industry standards and are reviewed at least annually during PCI DSS, ISO 27701, ISO 27001, ISO 27018 & SOC 2 external audits.

AIS-01.2 [Yes]

Cloudflare's information security policies are aligned with industry standards and are reviewed at least annually during PCI DSS, ISO 27701, ISO 27001, ISO 27018 & SOC 2 external audits.

AIS-02.1 [Yes]

AIS-03.1 [Yes]

AIS-04.1 [Yes]

Cloudflare has a well-developed SDLC that includes security design reviews. Secure development training is provided to the engineering team at least annually. The content includes secure coding techniques based on industry best practices such as the OWASP guide. The operating effectiveness of this control can be found in our PCI Attestation of Compliance (AoC) and our SOC 2 type II report.

AIS-05.1 [Yes]

Cloudflare has established processes for accepting new systems in accordance with relevant security standards and compliance requirements.

AIS-05.2 [Yes]

AIS-06.1	[Yes]

Cloudflare has a well-developed SDLC that includes security design reviews. Secure development training is provided to the engineering team at least annually. The content includes secure coding techniques based on industry best practices such as the OWASP guide. The operating effectiveness of this control can be found in our PCI Attestation of Compliance (AoC) and the SOC 2 type II report.

AIS-06.2	[Yes]
AIS-07.1	[Yes]

Cloudflare prioritises patches based on the severity of the vulnerabilities. These are installed as per PCI DSS guidelines for patching vulnerabilities.

Cloudflare represents that it is in compliance with applicable security and privacy laws of the countries where we operate.

Cloudflare has taken numerous internal-facing steps including but not limited to documenting our data flows and records of processing activity, as well as ensuring we have put in place data processing addendums with any vendors who process personal information on our behalf to comply with the GDPR. We also remain certified under the EU-US and Swiss-US Privacy Shield frameworks for onward transfers of EU data to the United States. (See https://www.cloudflare.com/privacyshield/)

STA-01.1 [Yes]

Cloudflare relies on its data center providers to enforce physical security measures on their premises. Cloudflare has a dedicated Physical Security team for its corporate locations.

These data centers are audited as part of the annual PCI DSS external audit. Additionally, access to these facilities is only provided to personnel with legitimate business justification.

STA-01.2 [Yes]

STA-02.1 [Yes]

Cloudflare policies are reviewed at least annually to ensure they are aligned to industry best practices and current threat landscape.
Cloudflare's dedicated third party risk management team conducts annual assessment on vendors/sub-processors to ensure compliance to baseline security standards set by Cloudflare as per policies.

STA-03.1 [Yes]

STA-04.1 [Yes]

Cloudflare covers security responsibilities through the DPA and Data Security Addendum or Data Center Security Addendum

STA-05.1 [Yes]

STA-06.1 [Yes]

STA-07.1 [Yes]

STA-08.1 [Yes]

STA-09.1	[Yes]

These are covered in our MSAs and DSAs. We also include out DPA as part of agreements which cover audit requirements as well as highlight out technical and organisation measures in its annex 2.
